

Dear Sir/Madam,

I am applying for a position as advertised by you.

I have just completed my Masters in Information Technology from Latrobe University. I started my career in Telecommunications as Operational and Maintenance Engineer where I have worked up on major projects in Telecommunications which has given me great understanding of problem solving and employing new software and removing faults in system.

After working in telecommunications, I moved into IT and worked as Junior Web Developer. My position allowed me to maintain and monitor web applications. I used to write code using JavaScript for front end with CSS. Also, I have used MSSQL for my database. I have made API using PHP. As part of role I use to test software by troubleshooting the bugs.

I have experience working within a large team. I have attended several presentations and presented my work to my clients. I always have optimistic approach towards my tasks and never give up until I reach end results.

I am very hard worker and honest person. I am always willing to learn and put my hard work by using my knowledge of engineering. I have organising and managing abilities. My previous job has allowed me to strengthen my coding skills, handling critical project situations. I have ability to quick response for changing situation.

I have attached a copy of my resume for your review. I would appreciate the opportunity to discuss my qualifications more extensively in an interview. I can be reached at 0434844802 or via e-mail: [satindergill07@yahoo.com](mailto:satindergill07@yahoo.com) . Thank you for your time and kind attention. I hope to hear from you in near future.

Yours Sincerely,

Satinder Singh Gill
